

Seals and stamped parts

- Turned and milled parts
- Cast and moulded parts
- Water jet cut parts
- Special parts sealing technology
- Semi-finished product range
- Special parts and more

SPAEH service

Visual inspection for stamped parts via fully automated read-out machine

We can test the following seals and stamped parts:

- up to 73 mm diameter
- from 1 mm thickness

Testing is possible for:

- contour
- thickness
- kiss-cut parts
- stamping scrap
- colour

We generally recommend carrying out a part-specific test for all stamped parts first.

Furthermore, precise piece count packaging in PE pouches as well as individual printing according to customer specifications (see following photo) are also possible.

For the implementation of your special requirements please contact our customer account manager in the sales department.
