

Seals and stamped parts

**Turned and milled parts**

Cast and moulded parts

Water jet cut parts

Special parts sealing technology

Semi-finished product range

Special parts and more

## Big is beautiful – larger milled parts by SPÄH made of plastic plates, consignable in any and all shapes

With the aid of our multi-function plotter, we can produce for you precise plastic parts up to 3 x 2 metres in size, and 70 mm in thickness. They can also be provided in any form desired and lot quantity starting at production-batch size 1.

The milled parts can be provided by us in synthetic materials such as:

- |        |        |       |
|--------|--------|-------|
| ▪ PA   | ▪ PC   | ▪ PE  |
| ▪ PEEK | ▪ POM  | ▪ PP  |
| ▪ PS   | ▪ PTFE | ▪ PVC |
- ...and any more.

The basis for this is our well-assorted and semi-finished inventory of plate material in all standard sizes. A short-term production consignment is possible at any time, and bottlenecks regarding working materials are avoided, thus enabling us to guarantee our supply deadlines.

If required, we can also provide high-performance synthetics and special working materials according to your specifications. Just ask us!

In addition to tailor-made dimensioning for these milled parts, the cutter plotter can also offer further advantages upon request! When processing the plates we can thus provide you with the following features as well

- Holes to be cut,
- Chamfered edges,
- Recesses, patterns, lettering or other contours to be milled.

**Standard CNC-milled parts made of plastic plates** are (for example): skimmers, bumper stops, driving plates, faceplates, retainers and much more.

**The consignment process is quite simple for you.** You merely send us your DXF or DWG specifications and we configure the data into the plotter, and the component production can begin immediately. If the specifications are not available, we can generate, for a fee, the required CNC programme from your drawing.

If you have questions, please call your contact person in the sales and distribution department.
